

Mars “888” Traffic Breaker LED Conversion Kit

Easily convert nearly any incandescent Mars “888” Traffic Breaker to the latest and most efficient LED technology.

Great news for current users of the Mars “888” Traffic Breaker – LED Conversion Kits are now available! Modernizing the “888’s” iconic stainless steel housing with LED technology is a snap. The kit takes less than 30 minutes to install, but adds thousands of hours of maintenance free life to the beacon.

Features:

- Long lamp life—LEDs rated at 50,000 hours versus 300 hours for incandescent
- 50% lower power draw —less than 1.5 amps at 12VDC
- Extra-bright, focused warning beam
- Durable light source with no fragile filaments to break
- Five year warranty on the LED module

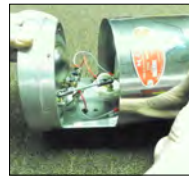

LED Conversion Kit Includes:

- A. LED light module with heat sink
- B. DC LED driver
- C. Wire nuts
- D. Wire ties

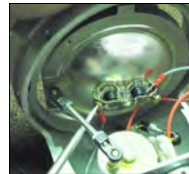

Basic Step to install the LED Conversion Kit*

Step One

Separate the enclosure from the light housing.

Step Two

Remove the light housing’s screws and clips. Remove and discard incandescent bulb.

Step Three

Attach the LED driver and module.

Step Four

Bundle and secure wires. Carefully insert assembly back into the housing.

* Please read the LED Conversion Kit’s complete installation instructions before beginning installation. Instructions are available at www.triliteinc.com

Mars "888" Traffic Breaker

Tri Lite's iconic Mars "888" Traffic Breaker warning light is now available with energy-efficient, long-life LEDs.

The rugged LED Traffic Breaker is offered in addition to the classic halogen version widely used today. Both warning beacons utilize a distinctive gimbal mounted lamp to generate a "triple eight" light pattern that alerts traffic to approaching emergency equipment. The bright, oscillating light aids in clearing the road, day or night, even in adverse conditions while the polished stainless steel housing looks great on any vehicle!
